Volume 130 May 1983

CONTENTS

The shear-layer structure in a rotating fluid near a differentially rotating sidewall. G. J. F. VAN HEIJST *page* 1

Turbulence structure in stably stratified open-channel flow. SATORU KOMORI, HIROMASA UEDA, FUMIMARU OGINO and TOKURO MIZUSHINA 13

Weakly nonlinear interactions and wave trapping. YURIKO RENARDY 27

The linear development of Görtler vortices in growing boundary layers. P. HALL 41

Perturbed bifurcation theory for Poiseuille annular flow. GARY S. STRUMOLO 59

The interaction of waves and a turbulent current: waves propagating against the current. P. H. KEMP and R. R. SIMONS 73

A study of the spanwise structure of coherent eddies in the viscous wall region. C. NIKOLAIDES, K. K. LAU and T. J. HANRATTY 91

Waves in meandering streams. CHIA-SHUN YIH 109

The breaking of axisymmetric slender liquid bridges. J. MESEGUER 123

The dependence of shoreline contaminant levels upon the siting of an effluent outfall. RONALD SMITH 153

Evolution of two-dimensional disturbances in the Rayleigh–Bénard problem and their preferred wavenumbers. A. V. GETLING 165

A theory for the rapid flow of identical, smooth, nearly elastic, spherical particles. J. T. JENKINS and S. B. SAVAGE 187

Flow of an incompressible fluid in a partially filled, rapidly rotating cylinder with a differentially rotating endcap. M. A. SHADDAY, R. J. RIBANDO and J. J. KAUZLARICH 203

A class of elliptical free-surface flows. A. L. NEW 219

A streamline coordinate system for distorted two-dimensional flows. J. J. FINNIGAN 241

Steady reflection, absorption and transmission of small disturbances by a screen of dusty gas. R. ISHII and H. MATSUHISA 259

Baroclinic instability over wavy topography. R. A. DE SZOEKE 279

Longitudinal dispersion coefficients for varying channels. RONALD SMITH 299

Steady and unsteady separation in an approximately two-dimensional indented channel. C. D. BERTRAM and T. J. PEDLEY 315

Thermocapillary convection in a rectangular cavity: asymptotic theory and numerical simulation. M. STRANI, R. PIVA and G. GRAZIANI 347

Numerical study of secondary flows and roll-cell instabilities in rotating channel flow. CHARLES G. SPEZIALE and SIVAGNANAM THANGAM 377

Transition of mechanically generated regular waves to wind waves under the action of wind. MITSUHIKO HATORI and YOSHIAKI TOBA 397

Small-scale structure of the Taylor–Green vortex. MARC E. BRACHET, DANIEL I. MEIRON, STEVEN A. ORSZAG, B. G. NICKEL, RUDOLF, H. MORF and URIEL FRISCH 411

On the modelling of effects of negative production of temperature-fluctuation intensity in the turbulent mixing layer. A. F. KURBATSKII and N. N. YANENKO 453

REVIEWS

Heat Transfer and Fluid Flow in Rotating Coolant Channels, by W. D. Morris; Advances in Heat Transfer, Vol. 15, edited by J. P. Hartnett and T. F. Irvine; Power Condenser Heat Transfer Technology, edited by P. J. Marto and R. H. Nunn; Fouling of Heat Transfer Equipment, edited by E. F. C. Somercales and J. G. Knudsen; Heat and Mass Transfer in Metallurgical Systems, edited by D. B. Spalding and N. H. Afgan 463

Rheometry: Industrial Applications, edited by K. Walters; Mechanics of Viscoelastic Fluids, by S. Zahorski 465

ADDENDUM 468
